

THE BENEFITS TO YOU OF HAVING A PARTNER IN CA4IT

When it comes to working with the independent professional contractor on tax and accounting issues, nobody knows this industry better than we do! ca4it has specialized in working with the independent professional to minimize their taxes and maximize their retained earnings through our network of branches across Canada since 1984.

ca4it is always looking for new customers; candidates interested in becoming incorporated and / or independent contractors looking for an outstanding accountancy firm to manage the accounting needs of their company. To facilitate this we recognize that our greatest source of personal referrals results from the relationships that we build with professional consulting organizations, clients, staffing companies and the multitude of organizations that come in to contact with the independent contractor on a daily basis.

To develop and encourage these relationships, ca4it has developed a wide range of services and offerings that will enhance your business:

- If you have an independent contractor that has tax and accounting related questions, refer them to us and we will meet them for a free introductory consultation. In this meeting each contractor will receive a clear outline of the steps they can take to begin to minimize their taxes paid and maximize their retained earnings, specific to their particular situation, at no cost and with no obligation.
- We are the industry experts on the independent contractor. If anyone in your organization has a question regarding a tax or accounting related issue specific to an independent contractor, call us and we will give you a professional, qualified answer from a tax professional, at no charge.
- Ca4it recommends to independent contractors earning greater than \$60,000 annually (approximately \$30 per hour) that they incorporate. This model maximizes your margin/profitability per contract and also has the additional benefit of not requiring your firm to collect, match and remit CPP, EI EHT and other legislatively required deductions for sole proprietors. This increased margin opportunity is of benefit to both you and the independent contractor
- Seminars are a great way to provide training, share information and generate synergy. ca4it offers public seminars on a variety of topics that will be of interest to your staff as well as the independent contractor. These seminars can also be customized and done privately for your own group of contractors and / or your staff. Whether you take advantage of our public seminars or have us customize one for you personally, there is no charge.
- Since 1984 and with hundreds of business partners, ca4it has been collecting information and working with thousands of independent contractors. Each partner we deal with has our personal guarantee that we will never make this information available to anyone in the community. We are a professional accountancy firm and any information you share or divulge to us will always remain confidential.
- An extensive list of FAQ's and other pertinent information is available on our web site, which we update and maintain daily.
- On our website we maintain a link to all firms that we partner with and recommend. Your firm will be added to this list with a direct link to your web site and optionally you can add a link on your site to ours.
- Through our network of branches across Canada we can offer these services to you at most locations across Canada.
